## EDUCATION

### Southern New Hampshire University

Manchester, NH

*Bachelor of Science in Computer Science*

*Expected May 2027*

- Honor Roll since January 2024

## EXPERIENCE

### SoundSafe.ai

*Jun. 2025 – May 2026*

*Galena, IL*

#### Software Engineer

*Dec. 2025 – May 2026*

- Architected real-time software systems spanning FastAPI backend services, GPU-accelerated video processing, and React/Next.js monitoring dashboards.
- Built low-latency multi-stream inference pipelines using FFmpeg, GStreamer, YOLO, and WebSockets, processing 6 concurrent DOT camera feeds at approximately 26 FPS.
- Built production-grade drone detection achieving 99.16% mAP@0.5 and 42.5 FPS real-time inference for deployment.

#### AI/ML Intern

*Jun. 2025 – Dec. 2025*

- Developed a PPO-based autonomous navigation system in NVIDIA Isaac Lab using 8,192 parallel environments and 360° LiDAR perception.
- Engineered a custom CNN-based OCR system for live video streams and optimized computer vision pipelines using Python, PyTorch, YOLO, and OpenCV.

### Commission Sales Associate

*Dec. 2022 – Sep. 2025*

*Slumberland Furniture*

*Dubuque, IA*

- Ranked #1 in company-wide Flexsteel sales with \$650K+ annual sales, exceeded monthly targets by 15%, and generated \$100K+ during 2024 Black Friday.

### Repair Technician

*Jul. 2021 – Dec. 2022*

*CPR Cell Phone Repair*

*Dubuque, IA*

- Diagnosed and repaired mobile devices, computers, and gaming consoles while troubleshooting hardware and software issues.
- Managed inventory, purchase orders, device refurbishment, and daily technical operations, earning a 70% wage increase within one year.

## PROJECTS

### Full-Stack RSVP Management Platform | *Python, FastAPI, HTML/CSS, PostgreSQL*

- Built a full-stack RSVP platform with FastAPI, PostgreSQL, secure API routes, automated testing, and an administrative dashboard.
- Improved LCP by 87% (32.9s → 4.4s), reduced page payload from 6.6 MB to 1.0 MB, and achieved 96% test coverage.

### 2D Multiplayer Tactical Shooter – Gunfight Engine | *Java, WebSockets, ECS, HTML5/Canvas*

- Built a server-authoritative multiplayer game engine using a custom ECS, Java WebSockets, matchmaking, projectile physics, and line-of-sight systems.
- Engineered 60 TPS server simulation with 0.752 ms average tick time, supporting 6 concurrent players per room and less than 17 ms local network latency.

### Automatic License Plate Recognition System | *Python, FastAPI, YOLOv8, PaddleOCR, WebSockets*

- Built a real-time ALPR pipeline combining YOLOv8 detection, PaddleOCR recognition, stateful tracking, and a FastAPI/WebSocket server.
- Achieved 85.9 FPS with 11.6 ms mean latency and 15.3 ms p95 latency while maintaining 85.0% detection precision at 0.5 IoU.

## TECHNICAL SKILLS

**Languages:** Python, Java, JavaScript, TypeScript, SQL, C++

**Frameworks & Technologies:** React, Next.js, FastAPI, REST APIs, WebSockets, PostgreSQL, Prisma, Docker, Git, FFmpeg, GStreamer

**AI/ML & Tools:** PyTorch, TensorFlow, YOLO, OpenCV, Reinforcement Learning, NVIDIA Isaac Lab, NVIDIA DeepStream
